SUMMARY

Dynamic professional with a strong foundation in knowledge and creativity, seeking opportunities to contribute effectively to organizational objectives. Proven ability to develop skills while delivering innovative solutions aligned with company goals. Committed to continuous growth and learning within the industry.

EDUCATION

B.TECH(CE)

Meerut Institute of Engineering and Technology, Meerut | Percentage : 75.5% | (2019 - 2023)

INTERMEDIATE(PCM)

Saint James School | Percentage : 78.8% | (2018 - 2019)

HIGH SCHOOL

Saint James School | Percentage : 83.6% | (2016 - 2017)

SKILLS

JavaScript React.js Node.js Express.js Mongo DB Version Control

PROJECTS

GO RIDE

Tech Stack : MERN

- Developed Go Ride App, a ride-hailing platform inspired by Uber
- Implemented key features such as real-time ride booking and fare estimation.
- Utilized Google Maps API for real-time navigation and route tracking.

CHAT APP

Tech Stack : MERN

- Implemented Socket.io for real-time chat updates and notifications.
- Integrated Amazon S3 for secure and scalable image uploads.
- Added features like user authentication, channel creation, direct messaging, and group chats.
- Ensured seamless performance with efficient backend and real-time communication mechanisms.

IMAGE GRAM

Tech Stack : Node.js, Express.js, Mongo DB

- Implemented user authentication and session management.
- Integrated Amazon S3 for secure image uploads and storage.
- Enabled CRUD functionality for posts (create, update, delete).
- Added a commenting system for user interaction with posts.
- Designed RESTful APIs for seamless communication between frontend and backend.

COIN GECKO CRYPTO TRACKER

Tech Stack : React.js

- The CoinGecko Crypto Tracker app displays a table of cryptocurrencies fetched from the free CoinGecko API.
- Clicking on a coin navigates to the details page with the coin's description and various charts.
- The app includes routing, lazy loading for performance, and error boundaries for failure handling.
- Zustand manages the state, and debouncing is used for efficient search input handling.
